InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

This IBM® Redbooks® publication describes data migrations between IBM DS8000® storage systems, where in most cases one or more older DS8000 models are being replaced by the newer DS8870 model. Most of the migration methods are based on the DS8000 Copy Services. The book includes considerations for solutions such as IBM Tivoli® Productivity Center for Replication and the IBM Geographically Dispersed Parallel Sysplex™ (GDPS®) used in IBM z/OS® environments. Both offerings are primarily designed to enable a disaster recovery using DS8000 Copy Services. In most data migration cases, Tivoli Productivity Center for Replication or GDPS will not directly provide functions for the data migration itself. However, this book explains how to bring the new migrated environment back into the control of GDPS or Tivoli Productivity Center for Replication. In addition to the Copy Services based migrations, the book also covers host-based mirroring techniques, using IBM Transparent Data Migration Facility (TDMF®) for z/OS and the z/OS Dataset Mobility Facility (zDMF).

Includes notices of research projects submitted to the Smithsonian Science Information Exchange concerning toxicological testing.

-- Discusses all aspects of laying foundations, raising walls, and more for small or one-person crews

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Although blurred and heavily contested, the concept of 'tourist destination' still deserves careful attention. Despite its unstable characteristics, 'destination' is a central and meaningful term in play among all parties in the field of tourism, including tourists, tourism operators, and politicians, as well as students and tourism scholars. This anthology draws on different approaches and discourses of tourism destination development, while focusing on how they are shaped and reshaped and how they should be read and rehearsed. The book reveals dominant as well as alternative approaches to the field. The authors demonstrate how tourism destinations are commercial, but socially embedded; how they are both material and territorial, but at the same time socially constructed; how production of touristic brands and images are vital, but contested. Such tensions are unfolded through paradigmatic discussions and a series of case studies from the northern hemisphere. The chapters in the book investigate how destination development is catalysed through theming, how changing environments lead to reorientations, and how destinations are political. Altogether, the book provides experts and students with an up-to-date theoretical and empirical insight into tourist destinations.
