Understandings - Topic A: Air & Aerodynamics.  
Students explore the characteristics of air  
and the interaction between moving air and  
solids. They learn that air is a compressible  
fluid, that it is composed of many gases, and  
that moving air can support solid materials  
in sustained flight.

Aerodynamics is the study of forces and the  
resulting motion of objects through the air.  
Studying the motion of air around an object  
allows us to measure the forces of lift,  
which allows an aircraft to overcome gravity.  
Test your understanding of this course by
