BOGE S series screw compressor, including its additional equipment, is exclusively intended for the compression of air. The air taken in must not contain any explosive or chemically instable gases or vapours. Do not exceed the specified final compression temperature. BOGE screw compressors are designed for stationary operation.

Operating instructions

The BOGE C series is a trendsetter in its class: less noise, less pipework, less connections in contrast to more output, more individual configuration possibilities and more efficiency and requiring a minimum of space only. We have listened closely to the wishes of our customers – with the C series we provide the air to work.

BOGE turbo compressors are catapulting the world of compressed air into a new era: you save resources and energy, use not a drop of oil, and reduce the noise level to a minimum despite the high speeds. Whether high or low pressures are called for – low-wear turbo technology sets completely new standards for efficiency and cost savings.
