~~Cathodic Protection~~

~~System Guidelines~~

~~Nwglde~~

Cathodic protection

(CP) is a technique used

to control the corrosion

of a metal surface by

making it the cathode of

an electrochemical cell.

A simple method of

File Type PDF

Cathodic

protection connects the metal to be protected to a more easily corroded "sacrificial metal" to act as the anode. The sacrificial metal then corrodes instead of the protected metal.
