Constructivist psychotherapy focuses on the meaning that clients attribute to their world, and the way that this shapes their life and contributes to their difficulties. In this book, Robert A. Neimeyer, a leading figure in the field, provides a clear and accessible explanation of the key features of this approach. Constructivist Psychotherapy: Distinctive Features concentrates on the 30 key commitments that distinguish constructivism from other cognitive behavioural perspectives. Divided into two sections – Theory and Practice – this straightforward book is illustrated throughout with case material and recent research findings. Neimeyer provides us with a fresh perspective on familiar material, together with a clear, concise introduction to material that the reader may be less familiar with, making this book a valuable text for professionals in training as well as a source of new ideas for practising therapists of constructivist psychotherapy.

Research Design and Methodology in Studies on Second Language Tense and Aspect provides an up-to-date review of past and current methodologies for the study of the L2 acquisition of tense and aspect. More specifically, the book addresses the following issues related to the design of studies for research in tense and aspect: Theoretical frameworks (e.g., Are research questions investigated within one theoretical approach incompatible with other approaches?) Elicitation procedures (Do different types of tasks elicit different types of tense-aspect data?) Coding of data (e.g. How are lexical categories defined and coded?) Data analysis (e.g., What statistical tests are more appropriate to analyze language data?) The volume provides new insights into the study of L2 tense-aspect by bringing together well renowned scholars with experience in the research design of research this area of the field.
