Form is one of the seven elements of art which are the visual tools that an artist uses to compose a work of art. In addition, to form, they include line, shape, value, color, texture, and space. As an Element of Art, form connotes something that is three-dimensional and encloses volume, having length, width, and height, versus shape, which is two-dimensional, or flat. A form is a shape in three dimensions, and, like shapes, can be geometric or organic.

Accessible Compact Form. This form uses the placeholder attribute instead of the <label> tag for the email and password fields. This results in a more compact form because no extra space is required for the labels. However, simply removing the <label> tags is not good from an accessibility standpoint. People using screen readers could have problems if there is no <label> element.

A form-based code is a regulation, not a mere guideline, adopted into city, town, or county law. A form-based code offers a powerful alternative to conventional zoning regulation. Form-based codes address the relationship between building facades and the public realm, the form and mass of buildings in relation to one another, and the scale and types of streets and blocks. The regulations and standards in form-based codes are presented in both words and clearly drawn diagrams and other visuals.
