The engine section rotates freely as does the turbine fan and reduction gear box. This engine has an early electronic fuel control fitted but also has a mechanical system to allow manual operation overriding the electronics. Research reflects that the RR Gas turbines were very similar to the GE T58 US Gas Turbine Engine.

**Parts Type**  
This amendment supersedes two existing airworthiness directives (AD's), applicable to General Electric Company (GE) T58 and CT58 series turboshaft engines. The current AD's revised the counting method for hours in repetitive heavy-lift (RHL) service and reduced the life limit for rotating components.
