Re: Restoring a Johnson CD-12, 1955 5-1/2. Great engines, they typically need the coils replaced, water pump and carb rebuilt, and check that the lower unit is not leaking. I added the Mikunin pump mod. Tom's outboard page is down, or I would put a link to this excellent site on rebuilding a CD series engine.

Re: 1955 Johnson 5.5 CD-12 project The last thing to do before attaching the carb back on is applying some grease to the gasket between the carb and the intake manifold to help prevent air leaks. Cut and fill the excess gasket (that seperates both halves of carb) where the carb connects to manifold and where carb connects to air silencer you want the carb to be flush with gasket, and mate evenly.

these manuals are based on actual teardowns done by Seloc's editors/authors in our on-site facility. Every manual features: -Easy-to-follow, step-by-step, illustrated procedures -Hundreds of exploded drawings, photographs and tables -Troubleshooting sections -Accurate specifications and wiring diagrams Covers all engines and drive units, including transmissions. Includes carbureted and fuel injected engines. Over 1,000 illustrations.

* Outboard motor repair for the average guy * Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of “cheap power.” Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours’ work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You’ll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellers, Lower Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. This book has always been very popular and well-used in its print edition. Now it's available as an e-book so you can load it into your phone or tablet and always have this wealth of repair / maintenance information at your fingertips, even when out on your boat.

"Your customers are only satisfied because their expectations are so low and because no one else is doing better. Just having satisfied customers isn't good enough anymore. If you really want a booming business, you have to create Raving Fans." This, in a nutshell, is the advice given to a new Area Manager on his first day--in an extraordinary business book that will help everyone, in every kind of organization or business, deliver stunning customer service and achieve miraculous bottom-line results. Written in the parable style of The One Minute Manager, Raving Fans uses a brilliantly simple and charming story to teach how to define a vision, learn what a customer really wants, institute effective systems, and make Raving Fan Service a constant feature--not just another program of the month. America is in the midst of a service crisis that has left a wake of disillusioned customers from coast to coast. Raving Fans includes startling new tips and innovative techniques that can help anyone create a revolution in any workplace--and turn their customers into raving, spending fans.

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.
