Axiom Business Book Award Silver Medalist in Leadership • Soundview Best Business Book A “Highest Rated CEO” who has transformed his organization into a billion-dollar company and a “Top Place to Work” shows leaders how truly prioritizing employees isn’t just good for employees—it’s good for business. Imagine a company where everybody loves to work, where employees feel not just “satisfied” but truly cared for, respected, and energized. Think of the impact this would have on recruitment, retention, customer satisfaction, innovation, and overall performance. Aron Ain, the award-winning CEO of Kronos, a global provider of workforce management and human capital management cloud solutions, believes that anything is possible when people are inspired. By embracing employee development and engagement as a growth strategy, Ain transformed his company’s culture and built a billion-dollar business. This book takes leaders and managers inside Kronos’s highly

# Download Free Kronos Database Hr User Guide

admired WorkInspired culture, showing them the surprisingly simple rules to follow to replicate that success. Ain's inspiring guide reveals the best practices that have earned Kronos distinctions on coveted lists, such as Glassdoor's 100 Best Places to Work, Fortune's 100 Best Companies to Work For, Forbes's America's Best Employers, and the Boston Globe's Top Places to Work. These include over-communicating and truth-telling, trusting your people again and again, holding managers accountable for being great at what they do, allowing employees flexible schedules and open vacation time, challenging your people to put the company out of business with new and revolutionary ideas, and welcoming back boomerang employees. Many executives talk about how "their people are their greatest asset." Ain challenges leaders to "walk the talk" and put people first, whether they oversee a team of five or an organization of 500,000. When they do, employees won't be the only ones who thank them. Customers and shareholders will, too.

Profiles each of the companies of Standard & Poor's SmallCap 600 Index and their stocks, providing information to assist investors in making informed business decisions

Revised edition of the authors' SAP SuccessFactors employee central, [2016]

Provides details on over 550 internships and summer jobs.

Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten

# Download Free Kronos Database Hr User Guide

to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction
