With more than 100,000 copies in print, *Living with the Passive-Aggressive Man* draws on case histories from clinical psychologist Scott Wetzler's practice to help you identify the destructive behavior, the root causes and motivations, and solutions. Do you know one of these men? The catch-me-if-you-can lover... Phil's romantic and passionate one minute, distant and cold the next. The deviously manipulative coworker or boss... Jack denies resenting Nora's rapid rise in the company, but when they're assigned to work together on a project, he undermines her. The obstructionist, procrastinating husband... Bob keeps telling his wife he'll finish the painting job he began years ago, but he never seems to get around to it. These are all classic examples of the passive-aggressive man. This personality syndrome—in which hostility wears a mask of passivity—is currently the number one source of men's problems in relationships and on the job. In *Living with the Passive-Aggressive Man*, Scott Wetzler draws upon numerous case histories from his own practice to explain how and why the passive-aggressive man thinks, feels, and acts the way he does. Dr. Wetzler also offers advice on:

- How to avoid playing victim, manager, or rescuer to the "P-A"
- How to get his anger and fear into the open
- How to help the "P-A" become a better lover, husband, and father
- How to survive passive-aggressive game playing on the job

Living with a man's passive aggression can be an emotional seesaw ride. But armed with this book, you can avoid the bumpy landings.

Living in a love-hate relationship-with your spouse, kids, parents, friends, co-workers, and even God-can leave you feeling confused and furious. But the practical strategies presented in this book will help you overcome your most agonizing relational predicaments. Drawing on a wealth of experience as therapists and as best-selling authors, David Stoop and Stephen Arterburn provide you with: Insightful analysis of the "problem behind the problem behind the problem" in love-hate relationships Hands-on questionnaires and exercises to help you sort out your mixed-up feelings Real-life case studies that show how you can protect yourself from abuse without cutting yourself off from people you care about Professional advice to help you work through your bitterness and disappointment and manage the healing act of forgiveness

This book emerges from a heart of terror and courage, and is a poignant lesson in the power of faith. This translates into a fast moving inspirational story where lives are saved against impossible odds. The author shows the reader the tragedy of war torn Bosnia, at a time when ignorance, suspicion and fear were stirred into racial hatred, which quickly degenerated into the vicious circle of ethnic warfare. Many readers will take great comfort in the author's fortitude and marvel at her ability to see rays of hope penetrating the darkest clouds. She conveys the tragedy of Bosnia and demonstrates how, when tough love is put into action even when surrounded by pain and hatred, one can make a small contribution on the side of good. This true story offers hope to victims of violence by helping them to realise that others are prepared to make great sacrifices in order to ease their suffering and, in this case, save lives against impossible odds. It is the quality of child-like faith in God which helped the author and her husband through the darkest of hours, and which makes this such a potent story, because religion only becomes truly meaningful when it can be seen to be working in peoples lives, and making a difference.

With a view to deepening our understanding of sources of hatred and prejudice, this book uses a developmental and evolutionary perspective

to explore and explain the process by which our beliefs are conveyed to the youngest members of society. Discussing the psychological obstacles to peaceful relations between groups, the authors focus on the developmental processes by which we can work to diminish ethnocentrism, prejudice, and hatred, which children learn from a very early age. Until now, scholarship and practice in international relations have gravely neglected crucial psychological aspects of these terrible problems and have not yet explored the educational opportunities related to them. Addressing these promising lines of inquiry and innovation, this book fosters a more humane and less violent development in childhood and adolescence. Educators, religious leaders, developmental and social psychologists, will find this a valuable resource, as will a socially concerned segment of the public who are looking for practical ways to work for peace.

*Understanding and Dealing with Violence: A Multicultural Approach* situates violence within a social, cultural, and historical context. Edited by distinguished scholars Barbara C. Wallace and Robert T. Carter, this unique volume explores historical factors, socialization influences, and the historical and contemporary dynamics between the oppressed and the oppressor. State-of-the-art research guides a diverse group of psychologists, educators, policy-makers, religious leaders, community members, victims, and perpetrators in finding viable solutions to violence.

*Social Work Live* accesses multiple approaches to student learning: experiential, visual, and auditory. Carol Dorr emphasizes the important role of self-reflection and critical thinking in social work practice by paying special attention to process recordings and observing how the social worker reflects on her own reactions in the moment with the client. Students also can appreciate the important role of reflecting on their own interventions with clients after their sessions, acknowledging what went well and what could have been done better. *Social Work Live* encourages a constructivist perspective to practice that calls attention to the many possible interpretations and approaches to working with clients. The classroom provides an ideal opportunity for students to explore with each other different ways of making meaning out of clients' stories and intervening with them.

Revised 5th Edition Praise for the first edition of *Everyone's Guide to Cancer Therapy: How Cancer Is Diagnosed, Treated, and Managed Day to Day*: A landmark book . . . So much of what the cancer patient must know to make informed decisions. --Publishers Weekly \* A completely revised and accessible guide created by more than 100 esteemed oncologists for the millions of people whose lives are affected by cancer. The Centers for Disease Control reports that more than 20 million people in the U.S. are currently diagnosed with cancer, and 1.4 million people are expected to be diagnosed in the coming year. For the millions confronting cancer's many challenges, *Everyone's Guide to Cancer Therapy: How Cancer Is Diagnosed, Treated, and Managed Day to Day* relies on an esteemed panel of oncology specialists--more than 100 strong, and each experts in their fields--to completely update this definitive cancer resource. Equally informative and accessible, this comprehensive book navigates cancer patients and their caregivers through diagnosis, treatment, and supportive care. Every chapter has been methodically updated to include the latest medical breakthroughs and advice concerning cancer treatment, including: \* Information on recently approved targeted therapies for various cancer types \* The newest strategies in cancer diagnosis and prevention \* Cancer biology: translating scientific discoveries into meaningful advances for patients \* Supportive care and complementary approaches

This book explores the reality of ageing and old age from the perspectives of the individual and society. It emphasizes cross-cultural aspects of ageing and communication issues both within and across generations. The authors approach the understanding of ageing from a multi-disciplinary perspective, integrating biology, psychology, linguistics, sociology, and history. The book is organized as follows: historical and broader cross-cultural issues of ageing, followed by biomedical, psychological, social, and communicative aspects of ageing. The book concludes with an in-depth analysis of the existential dimension of ageing followed by an evolutionary perspective. ?
