Portfolio Theory Of Information Retrieval

Right here, we have
countless ebook
**portfolio theory of
information retrieval**
and collections to check
out. We additionally
give variant types and

Acces PDF Portfolio Theory

also type of the books to
browse. The adequate
book, fiction, history,
novel, scientific
research, as with ease as
various new sorts of
books are readily handy
here.

As this portfolio theory
of information retrieval,
it ends going on innate
one of the favored book
portfolio theory of

Acces PDF Portfolio Theory

information retrieval
collections that we have.
This is why you remain
in the best website to
see the unbelievable
books to have.

Portfolio Theory in IR

(2) Weight w_i is similar to the discount factors that have been applied to IR evaluation in order to penalize late-retrieved relevant documents [Järvelin and Kekäläinen(2002)] It can be easily shown that when $w_1 > w_2 \dots > w_n$, the maximum value of R_n gives the ranking order $r_1 > r_2 \dots > r_n$ This

follows immediately that maximizing R – by which the document with highest relevance score is retrieved first, the document with next highest is retrieved second, etc ...

Portfolio Theory of Information Retrieval

In general, the process of retrieving information consists of

Acces PDF Portfolio Theory

Of Information Retrieval

two phases. In the first phase, probabilistic retrieval models [1] compute the relevance between a given user's information need (query) and each of the documents in a collection. The second phase focuses on how to rank the calculated documents; the classic Probability Ranking Principle (PRP) [2]

Acces PDF Portfolio Theory

forms the theoretical basis of this phase, which ranks the documents with the order of decreasing probabilities of relevance to ...

Post-Modern Portfolio Theory for Information Retrieval ...

Recently, modern portfolio theory has been applied to

Portfolio Theory

modelling the

uncertainty and
correlation between
documents in
information retrieval.

Given a query, the aim
is to maximize the
overall relevance of a
ranked list of documents
and at the same time
minimize the overall
uncertainty of the
ranked list.
