that state building and nation building can be sep-arated only conceptually but that both processes have gone and are going hand in hand. I would say, however, that in the historical reality of societies these have been and are distinct processes. First of all, state building started with the crisis of feudalism, the Renaissance and the Reforma-tion.

State formation is the process of the development of a centralized government structure in a situation where one did not exist prior to its development. State formation has been a study of many disciplines of the social sciences for a number of years, so much so that Jonathan Haas writes that "One of the favorite pastimes of social scientists over the course of the past century has been to theorize about the evolution of the world's great civilizations." The study of state

Citizenship legislation figures prominently in state- and nation-building projects, in which defining who is a citizen and who belongs to the nation is very important. However, the process of defining citizens may entail excluding people belonging to minorities, as evidenced in the previous discussion on persons of Chinese descent in some South Asian countries.

This essay discusses, from a historical and contemporary perspective, the processes of state and nation building. The difficulties of making every nation a state and every state a nation, and the fact that people live intermingled within the borders of states and have different and often dual identity leads to arguments for multi-national states, states which abandon the dream of becoming ...

Nation-building is constructing or structuring a national identity using the power of the state. Nation-building aims at the unification of the people within the state so that it remains politically stable and viable in the long run. According to Harris Mylonas, "Legitimate authority in modern national states is connected to popular rule, to majorities. Nation-building is the process through which these majorities are constructed." Nation builders are those members of a state who take the initia

In multinational states, whether nationalism is state-building or state-destroying depends on the degree of integration of the nations with the state, which is in turn governed by a set of integrative factors. Finally, in state-nations there is no nation, and thus no nationalism, at the time of state-formation.

from the high Middle Ages until the end of the nineteenth century. Furthermore, it discusses whether England had been first a state or a nation or if this process occurred concurrently. It aims to determine when, how and why these developments proceeded in England the way they did, and if England's changes differed from the rest of Europe. This paper claims that in the case of England, state and nation building went hand in hand resulting in an early English nation-state. The rise of a national consciousness as well as the establishment of a sovereign state protecting individual rights would not have been possible without the early formation of parliament. Therefore, this paper argues that

the evolvement of Parliament was essential and played a crucial role in shaping England into a nation state.

Essay from the year 2008 in the subject Politics - International Politics - Region: Eastern Europe, grade: 8.5, Maastricht University, language: English, abstract: This paper describes the Polish nation and state building process from the 10th century to 1914. It focuses on the elements of feudalism, the nobility and religion, in order to understand the Polish process. Subsequently, it will give a detailed account of the elective monarchy in Poland and the formation of a nation without a proper state.

This book represents a unique endeavor to elucidate the story of Kosovo's unilateral quest for statehood. It is an inquiry into the international legal aspects and processes that shaped and surrounded the creation of the state of Kosovo. Being created outside the post-colonial context, Kosovo offers a unique yet controversial example of state emergence both in the theory and practice of creation of states. Accordingly, the book investigates the legal pathways, strategies, developments and policy positions of international agencies/actors and regional

players (in particular the EU) that helped Kosovo to establish its independence and gradually acquire statehood. Although contested, Kosovo, and its quest for statehood, represents a unique example of successful unilateral secession. The book therefore explores and analyses patterns of state formation and nation-building in Kosovo, and its transition to democracy. It presents a three-level assessment. First, seen from a historical perspective, the book examines the validity of the right of Kosovar-Albanians to self-determination and remedial secession. Second, from a legal positivist perspective, it scrutinizes all of the legalist arguments that support Kosovo's

right to statehood, and claims that both traditional and legality-based criteria for statehood remain insufficient to determine whether Kosovo has achieved statehood. Third, from a post-factum perspective, the book analyzes the scope and extent to which the internationally blended element was decisive in Kosovo's state-formation and state-building processes. It explains how the EU's involvement as an 'internationally blended element' in Kosovo's efforts to achieve statehood was instrumental and played a crucial role in shaping the emerging state. In particular, the book elaborates on how the EU was able to streamline its mode of intervention in the context of state-building and

"Why did the nation-state emerge and proliferate across the globe? How is this process related to the wars fought in the modern era? This book offers a new perspective on these issues. Analyzing datasets that cover the entire world over long stretches of time, Andreas Wimmer shows that political power and legitimacy are central to our understanding of nation building, ethnic politics and the violent conflicts associated with both. He argues that shifting from dynastic or imperial legitimacy to rule in the name of a nationally defined people was both the consequence

and the cause of wars between and within states. Once the 'like over like' principle was established, the ethno-political inequality that characterized nation-states with weak institutional capacity led to further ethnic conflict. Waves of War demonstrates why nationalism and ethnic politics are crucial for a proper understanding of world and domestic politics over the past 200 years"--
