The Four Domains of Leadership Strength As Gallup studied and worked with thousands of leadership teams, we began to see that while each member had his or her own unique strengths, the most cohesive and successful teams possessed broader groupings of strengths. So we initiated our most thorough review of this research to date.

Two leadership consultants identify three keys to being a more effective leader: knowing your strengths and investing in others' strengths, getting people with the right strengths on your team, and understanding and meeting the four basic needs of those who look to you for leadership.

An updated version of the StrengthsFinder program developed by Gallup experts to help readers discover their distinct talents and strengths and how they can be translated into personal and career successes.

Positive organizational psychology, with its focus on the identification and development of strengths, is a natural ally to executive development and leadership coaching. However, this approach is only just beginning to come to the attention of organizations and consequently, the research base for strength-based coaching is in its early stages of development. Strength-based Leadership Coaching in Organizations reviews strength-based approaches to positive leadership development and evaluates the evidence for their effectiveness, critically assesses their apparent distinctiveness and considers how strengths can be reliably assessed and developed in their organizational context. Strength-based Leadership Coaching in Organizations reviews key areas of leader and team development and describes a model of strengths development in organizations. It discusses the application of strength-based leadership coaching from the managerial and external perspective within the context of career stage, seniority, role challenges and organizational need in order to facilitate meaningful change. Finally, it covers the limitations of the strength-based approach to leadership development together with the challenges of integrating positive leadership development. It shows exactly what a strengths focus is and that there is increasing evidence that this approach does get results. Where other books focus on one model of identifying strengths, this book offers a balanced and critical examination, showing how to apply a positive strength-based approach.
