This book, now in its second edition, provides an in-depth overview of all segments of the structured finance business, with particular reference to market trends, deal characteristics and deal structuring. The goal is to assist readers in gaining a clear understanding of the common features of structured finance transactions. The process of deal structuring for each type of transaction is carefully analyzed, with extensively updated chapters on asset securitization, project finance, structured leasing transactions and leveraged acquisitions. In the new edition, particular attention is paid to novel areas of intervention, such as public – private partnerships and non-performing loans in the resolution of bank restructuring. Although the subject of much criticism, structured finance, when used properly, offers an effective solution to the credit crunch that many European countries are suffering and is also a way to revive a single capital market for debt instruments. Readers will find this book to be an illuminating guide to the business and to the best market practices in organizing transactions. It will be of value for BSc and MSc finance students, professionals and consultants alike.

The first comprehensive account of the European structured financial products market This comprehensive survey of the securitization market in Europe covers all asset-backed securities (the major classes and some nonconventional asset classes that have been securitized), residential and commercial mortgage-backed securities, collateralized debt obligations, and more. Frank J. Fabozzi, PhD, CFA, CPA (New Hope, PA), is the Frederick Frank Adjunct Professor of Finance in the School of Management at Yale University. Prior to joining the Yale faculty, he was a Visiting Professor of Finance in the Sloan School at MIT. Moorad Choudhry (Surrey, UK) is a Vice President in Structured Finance Services with JPMorgan Chase Bank.

An up-to-date look at the exploding CDO and structured credit products market In this fully updated Second Edition, financial expert Janet Tavakoli provides readers with a comprehensive look at the CDO and structured credit products market amid recent developments. In addition to a detailed overview of the market, this book presents key issues in valuing structured financial products and important quality control issues. Tavakoli shares her experiences in this field, as she examines important securitization topics, including the huge increase in CDO arbitrage created by synthetics, the tranches most at risk from new technology, dumping securitizations on bank balance sheets, the abuse of offshore vehicles by companies, the role of hedge funds, critical issues with subprime, Alt-A, and prime mortgage securitizations, and securitizations made possible by new securitization techniques and the Euro. While providing an overview of the market and its dynamic growth, Tavakoli takes the time to explore the types of products now offered, new hedging techniques, and valuation and risk /return issues associated with investment in CDOs and synthetic CDOs.

Comprehensive coverage of all major structured finance transactions Structured Finance is a comprehensive introduction to non-recourse financing techniques and asset-based lending. It provides a detailed overview of leveraged buyouts, project finance, asset finance and securitisation. Through thirteen case studies and more than 500 examples of companies, the book offers an in-depth analysis of the topic. It also provides a historical perspective of these structures, revealing how and why they were initially created. Instruments within each type of transaction are examined in detail, including Credit Default Swaps and Credit Linked Notes. A presentation of the Basel Accords offers the necessary background to understand the regulatory context in which these financings operate. With this book, readers will be able to: Delve into the main structured finance techniques to understand their components, mechanisms and how they compare Understand how structured finance came to be, and why it continues to be successful in the modern markets Learn the characteristics of financial instruments found in various structured transactions Explore the global context of structured finance, including the regulatory framework under which it operates Structured Finance provides foundational knowledge and global perspective to facilitate a comprehensive understanding of this critical aspect of modern finance. It is a must-read for undergraduate and MBA students and finance professionals alike.

Praise for Structured Finance & Insurance "More and more each year, the modern corporation must decide what risks to keep and what risks to shed to remain competitive and to maximize its value for the capital employed. Culp explains the theory and practice of risk transfer through either balance sheet mechanism such as structured finance, derivative transactions, or insurance. Equity is expensive and risk transfer is expensive. As understanding grows, and, as a result, costs continue to fall, ART will continue to replace equity as the means to cushion knowable risks. This book enhances our understanding of ART." --Myron S. Scholes, Frank E. Buck Professor of Finance, Emeritus, Graduate School of Business, Stanford University "A must-read for everyone offering structured finance as a business, and arguably even more valuable to any one expected to pay for such service." --Norbert Johanning, Managing Director, DaimlerChrysler Financial Services "Culp's latest book provides a comprehensive account of the most important financing and risk management innovations in both insurance and capital markets. And it does so by fitting these innovative solutions and products into a single, unified theory of financial markets that integrates the once largely separated disciplines of insurance and risk management with the current theory and practice of corporate finance." --Don Chew, Editor, Journal of Applied Corporate Finance (a Morgan Stanley publication) "This exciting book is a comprehensive read on alternative insurance solutions available to corporations. It focuses on the real benefits, economical and practical, of alternatives such as captives, rent-a-captive, and mutuals. An excellent introduction to the very complex field of alternative risk transfer (ART)." --Paul Wohrmann, PhD, Head of the Center of Excellence ART and member of the Executive Management of Global Corporate in Europe, Zurich Financial Services "Structured Finance and Insurance transcends silos to reach the Enterprise Mountain top. Culp superbly details integrated, captive, multiple triggers and capital market products, and provides the architectural blueprints for enterprise risk innovation." --Paul Wagner, Director, Risk Management, AGL Resources Inc.

Comprehensive coverage of all major structured finance transactions Structured Finance is a comprehensive introduction to non-recourse financing techniques and asset-based lending. It provides a detailed overview of leveraged buyouts, project finance, asset finance and securitisation. Through thirteen case studies and more than 500 examples of companies, the book offers an in-depth analysis of the topic. It also provides a historical perspective of these structures, revealing how and why they were initially created. Instruments within each type of transaction are examined in detail, including Credit Default Swaps and Credit Linked Notes. A presentation of the Basel Accords offers the necessary background to understand the regulatory context in which these financings operate. With this book, readers will be able to: Delve into the main structured finance techniques to understand their components, mechanisms and how they compare Understand how structured finance came to be, and why it continues to be successful in the modern markets Learn the characteristics of financial instruments found in various structured transactions Explore the global context of structured finance, including the regulatory framework under which it operates Structured Finance provides foundational knowledge and global perspective to facilitate a comprehensive understanding of this critical aspect of modern finance. It is a must-read for undergraduate and MBA students and finance professionals alike.

The most cutting-edge read on CDO and credit market structures Collateralized Debt Obligations and Structured Finance provides a state-of-the-art look at the exploding CDO and structured credit products market. Financial expert Janet Tavakoli examines securitization topics never before seen in print, including the huge increase in the CDO arbitrage created by synthetics; the tranches most at risk from this new technology; dumping securitizations on bank balance sheets; the abuse of offshore vehicles by companies such as Enron; and securitizations made possible by new securitization techniques and the introduction of the Euro. This valuable guide comprehensively covers one of the fastest growing markets on Wall Street, predicting where new bank regulations and other developments may lead to product growth or product extinction. While providing an overview of the market and its dynamic growth, Collateralized Debt Obligations and Structured Finance explores the types of products offered, hedging techniques, and valuation and risk /return issues associated with investment in CDOs and synthetic CDOs. Janet M. Tavakoli, MBA (Chicago, IL), has over eighteen years of experience trading, structuring, and marketing derivatives and structured products with major financial institutions in New York and London. She is also the author of Credit Derivatives and Synthetic Structures, now in its Second Edition (0-471-41266-X).

This book is designed to start with simple examples that progressively develop the reader's confidence to take on more complex tasks. There is very little theoretical discussion about computer science, operations research algorithms, mathematics, or finance. The thrust of the book is to teach the reader to break complex tasks down into simple tasks. It then looks to implement those simple tasks into VBA code using a critical subset of the features of the language. The tentative contents is: (1) Why? What? Who? Where? and How? (2) Common Sense (3) Securitizing A Loan Portfolio (4) Understanding the Excel Waterfall (5) Designing the VBA Model (6) Laying the Model Groundwork (7) Recorded Macros: A First Look at the VBA Language (8) Writing Menus: An Introduction to Data, Ranges, Arrays, and Objects (9) Controlling the Flow of the Model (10) Building Messaging Capabilities (11) Designing the Model 's Reports (12) Main Program and Menus (13) Writing the Collateral Selection Code (14) Calculating the Cash Flows (15) Running the Waterfall: Producing Initial Results (16) Debugging the Model (17) Validating the Model (18) Running the Model (19) Building Additional Capabilities (20) Documentation of the Model (21) Managing the Growth of the Model (22) Building Portfolio Monitoring Model (23) Valuation Techniques: How do we Determine Price? (24) Challenging Times For the Deal (25) Parting Admonitions

The discipline of securitization, almost twenty years old, has become a pervasive element of modern financial management. Yet, it has not been systematically covered in a textbook designed for both the school and workplace contexts. Elements of Structured Finance, the text version of a program of instruction in structured finance that the authors have offered at NYU and Hong Kong University, as well as in private training programs and consultancies, fills this void spectacularly.

A step-by-step guide to implementing and closing securitization transactions Securitization is still in wide use despite the reduction in transactions. The reality is that investors and institutions continue to use this vehicle for raising funds and the demand for their use will continue to rise as the world's capital needs increase. The Mechanics of Securitization specifically analyzes and describes the process by which a bank successfully implements and closes a securitization transaction in the post subprime era. This book begins with an introduction to asset-backed securities and takes you through the historical impact of these transactions including the implications of the recent credit crisis and how the market has changed. Discusses, in great detail, rating agency reviews, liaising with third parties, marketing the deals, and securing investors Reviews due diligence and cash flow analysis techniques Examines credit and cash considerations as well as how to list and close deals Describes the process by which a bank will structure and implement the deal, and how the process is project managed and tested across internal bank departments While securitization transactions have been taking place for over twenty-five years, there is still a lack of information on exactly how they are processed successfully. This book will put you in a better position to understand how it all happens, and show you how to effectively implement an ABS transaction yourself.
