'This is the most important - and fascinating - book yet written about how the digital age will affect our world' Walter Isaacson, author of *Steve Jobs* From two leading thinkers, the widely anticipated book that describes a new, hugely connected world of the future, full of challenges and benefits which are ours to meet and harness. *The New Digital Age* is the product of an unparalleled collaboration: full of the brilliant insights of one of Silicon Valley's great innovators - what Bill Gates was to Microsoft and Steve Jobs was to Apple, Schmidt (along with Larry Page and Sergey Brin) was to Google - and the Director of Google Ideas, Jared Cohen, formerly an advisor to both Secretaries of State Condoleezza Rice and Hillary Clinton. Never before has the future been so vividly and transparently imagined. From technologies that will change lives (information systems that greatly increase productivity, safety and our quality of life, thought-controlled motion technology that can revolutionise medical procedures, and near-perfect translation technology that allows us to have more diversified interactions) to our most important future considerations (curating our online identity and fighting those who would do harm with it) to the widespread political change that will transform the globe (through transformations in conflict, increasingly active and global citizenries, a new wave of cyber-terrorism and states operating simultaneously in the physical and virtual realms) to the ever present threats to our privacy and security, Schmidt and Cohen outline in great detail and scope all the promise and peril awaiting us in the coming decades. A breakthrough book - pragmatic, inspirational and totally fascinating. Whether a government, a business or an individual, we must understand technology if we want to understand the future. 'A brilliant guidebook for the next century . . . Schmidt and Cohen offer a dazzling glimpse into how the new digital revolution is changing our lives' Richard Branson

The United States has the most family-hostile public policy in the developed world. Contesting the idea that women need to negotiate better within the family, and redefining the notion of success in the workplace, Joan C. Williams reinvigorates the work-family debate and offers the first steps to making life manageable for all American families.

but around the globe. China is aggressive and uncooperative, and increasingly expects the world to bend to its wishes. The focus on Sino-US competition for global power has obscured & “ Asia's other great game& ” : the rivalry between Japan and China. A modernizing India risks missing out on the energies and talents of millions of its women, potentially hampering the broader role it can play in the world. And in North Korea, the most frightening question raised by Kim Jong-un's pursuit of the ultimate weapon is also the simplest: Can he control his nukes? In *Asia's New Geopolitics: Essays on Reshaping the Indo-Pacific*, Michael R. Auslin examines these and other key issues transforming the Indo-Pacific and the broader world. He also explores the history of American strategy in Asia, from the 18th century through today. Taken together, Auslin's essays convey the richness and diversity of the region: with more than three billion people, the Indo-Pacific contains over half of the global population, including the world's two most populous nations, India and China. In a riveting final chapter, Auslin imagines a war between America and China in a bid for regional hegemony and what this conflict might look like.

“ An intimately told story, with detailed and thought-provoking portraits. ” —The New York Times Book Review “ The Firsts stands out as one of the most important and best reported books written during the extraordinary political chapter in which we are living. ” —Nicolle Wallace, author and anchor, *Deadline: White House* on MSNBC NOW WITH UPDATED EPILOGUE In the November 2018 midterms, the greatest number of women in history were elected to Congress. It was a group diverse in background, age, experience, and ideology. From Alexandria Ocasio-Cortez and “ the Squad ” to a group with national security backgrounds calling themselves “ the Badasses, ” from the first two Native American women to the first two Muslim women, all were swept into office on a wave of grassroots support. Here, New York Times reporter Jennifer Steinhauer chronicles these women ' s first year in Congress, following their shift from trailblazing campaigns to the daily work of governance. In committee rooms, offices, visits back home with their constituents, and conversations in the halls of the Capitol, she probes the question: Will Washington, with its hidebound traditions and overpriced housing and petty power struggles, change the changemakers? Or will this Congress, which looks a little more like today ' s America, truly be the start of something new? Vivid and smart, *The Firsts* delivers fresh details, inside access, historical perspective, and expert analysis as these women—inspiring, controversial, talented, and rebellious—do

something surprising: make Congress essential again.

A Best Business Book of 2017 -- The Financial Times China is now the biggest foreign player in Africa. It's Africa's largest trade partner, the largest infrastructure financier, and the fastest-growing source of foreign direct investment. Chinese entrepreneurs are flooding into the continent, investing in long-term assets such as factories and heavy equipment. Considering Africa's difficult history of colonialism, one might suspect that China's activity there is another instance of a foreign power exploiting resources. But as author Irene Yuan Sun vividly shows in this remarkable book, it is really a story about resilient Chinese entrepreneurs building in Africa what they so recently learned to build in China--a global manufacturing powerhouse. The fact that China sees Africa not for its poverty but for its potential wealth is a striking departure from the attitude of the West, particularly that of the United States. Despite fifty years of Western aid programs, Africa still has more people living in extreme poverty than any other region in the world. Those who are serious about raising living standards across the continent know that another strategy is needed. Chinese investment gives rise to a tantalizing possibility: that Africa can industrialize in the coming generation. With a manufacturing-led transformation, Africa would be following in the footsteps of the United States in the nineteenth century, Japan in the early twentieth, and the Asian Tigers in the late twentieth. Many may consider this an old-fashioned way to develop, but as Sun argues, it's the only one that's proven to raise living standards across entire societies in a lasting way. And with every new Chinese factory boss setting up machinery and hiring African workers--and managers--that possibility becomes more real for Africa. With fascinating and moving human stories along with incisive business and economic analysis, *The Next Factory of the World* will make you rethink both China's role in the world and Africa's future in the globalized economy.
