What an exciting and appealing introduction to the sun,its purpose,and scientific information. From Photosynthesis, to water cycle, to the sun itself,is just a few things ...

Why Do Elephants Need the Sun? by Robert E. Wells

Elephants are also important because people can study them to find cures for human illnesses. Scientists have noticed that African elephants get cancer much less often than humans. They say African elephants "have at least 40 copies of genes that code for p53, the protein well known for its cancer-inhibiting properties," whereas humans have only two copies of those genes (Muchangi).

Why we need elephants - No More Poaching

"Elephants need to be here to teach humans the true meaning of humanity, companionship, trust and friendship...we can learn from them..." 15. "They are strong, gentle, and sensitive.

23 Reasons We Need To Save Elephants - BuzzFeed

Elephants need the opportunity and motivation to explore, to seek out solitude or social experiences, to search for the greenest grass and the tree with ripening fruit, they need autonomy and to feel secure.

Space, How Much Is Enough? - Global Sanctuary for Elephants

Elephants are made for walking, foraging and exploring large spaces. They need room to roam through interesting natural environments in the company of other elephants. Lucy has none of those things.

What All Elephants Need - SaveLucy.ca

The Asian elephant lives in areas with some of the highest human populations. Because they need larger amounts of land than other sympatric terrestrial mammals, they are the first to be affected by human encroachment. In extreme cases, elephants may be confined to small islands of forest among human-dominated landscapes.

Elephant - Wikipedia

Elephants can use their tusks to dig, lift objects, and move things out of the way. Tusks are also used to gather food and strip bark from trees. Elephant tusks make for good weapons, and can be helpful in fighting off predators and other elephants. Large tusks can also be used to attract the interest of females.

Why Do Elephants Have Tusks? | Sporcle Blog

Principally, they are formidable weapons against potential predators like the tiger (although tigers will only ever attack young or juvenile elephants) or in battle against other elephants. They are also used to aid foraging, digging, stripping bark and moving things out of the way; trained logging elephants are capable of lifting large logs with their tusks.

Elephant Tusks - Elephant Facts and Information

During the hot summer months, there's nothing quite like a nice refreshing and cooling dip in a pool, and it would seem that elephants agree. In fact, in some game parks, elephants will rarely...

Elephants depend on water for cooling, but only when it ...

Elephants are herbivores: they eat a range of plants, including grasses, fruit, and roots. An adult elephant consumes about 100 kg (220 pounds) of food and 100 litres (26 gallons) of water per day. These amounts can be double for a hungry and thirsty individual.

elephant | Description, Habitat, Scientific Names, Weight ...

"In Wells's latest exploration of the natural world, he makes his complicated topic appealing with ink-and-acrylic illustrations showing both elephants and baboons among plants and trees, looking sadly at a dried-up water hole, cavorting in the rain, standing on a seesaw, even investigating a wind turbine...this is an easy, solid introduction."--

Why Do Elephants Need the Sun? Wells of Knowledge: Amazon ...

Migrations need space, some of these elephants' travel over 100 km to reach their seasonal ranges." "The fact that elephants are still able to move such vast distances and beyond international borders speaks wonders and points to the amazing conservation initiatives employed by many governments and organisations striving to maintain functional space and connectivity between and around ...

Elephants migrate despite boundaries and borders - Africa ...

Elephants are also able to recognize all the members of their own clan. This helps them avoid getting lost in unknown herds. They can recall important places (like potential sources of food and water), even if they had not been there for many years – even decades.

Elephant Memory: Elephants Never Forget -- Is it true?

Marilyn: Why are elephants so endangered? Peter Gros: Many species of wild animals have become endangered due to loss of habitat. However, with elephants, the demand for elephant tusks, which for years was the main source of commercial ivory, has brought about a drastic decline in elephant populations over the past 150 years.
